

Dear Sir,

We introduce ourselves as the authorised “Distributors” of **M/s. Evercrete Corporation USA**. We have a few **UNIQUE PRODUCTS** to offer you for protection and extension of life of concrete structures against the elements to which they are subjected to on a daily basis, such as rain, salts, oils and chemicals. These products can be used on most old and new concrete and cementitious surfaces.

- (1) **EVERCRETE DEEP PENETRATING SEALER (DPS)** : DPS is an environmentally friendly, non – toxic, odourless, clear, water soluble liquid compound which is safe and easy to use. It outlasts and outperforms every other sealant on the market. It is inorganic and based on natural minerals and can be stored for extended periods.

DPS penetrates 20 to 30 mm below the concrete surface and chemically reacts with the alkali and lime found in concrete. This reaction creates a **silica gel membrane** within the pores and capillaries of the concrete **thereby permanently sealing them** against the ingress of moisture yet **allowing the concrete to breathe**. Over a period of time silica gel membrane hydrates and solidifies into a crystalline structure which **results in** ;

- (i) Extension of life of concrete structures
- (ii) Permanent Anti-Carbonation Coating.
- (iii) Increase in hardness and strength of concrete.
- (iv) Waterproofing of the concrete structure
- (v) Stoppage of water - borne contaminants like chlorides and acids both on positive and negative sides.

Evercrete DPS has been accredited / approved for use by IRC (Indian Roads Congress), NHAI (National Highways Authority of India), AAI (Airport Authority of India), MMRDA – Mumbai, etc for protection and preservation of Concrete Roads / Structures.

Contd...2/-

- (2) **EVERCRETE TOP SEAL (TS) :** Evercrete TS is a clear non glossy one coat application water repellent. It protects the concrete, sand stone, marble, paving and bricks from stains algae and gradual decay. It does not alter the color, texture or any other physical characteristic of surface to which it is applied and seals and waterproofs the surface.

- Uses :** (i) Sealing of concrete and cementitious surfaces
(ii) Decorative architectural finish.
(iii) Bathrooms, patios, decks, driveways and walls.
(iv) As an excellent added layer of protection over DPS.

- (3) **EVERCRETE DEEP CLEAN 250 (DC 250) :** DC 250 is a multi – purpose concrete cleaner that is designed to clean and “etch” the surface simultaneously.

- (4) **EVERCRETE EVERWOOD :** Evercrete Everwood is a penetrating alkali activated silica acro gel that seals, hardens and preserves most wood products.

We hope you would be interested in using these products considering their advantages over other products available in the market today. Please revert back with your requirements for doing the needful at our end. Also visit Website: [http:// www.polyflex.co.in](http://www.polyflex.co.in) **for more details on all the products.**

Best Regards
